-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to With tubular injection means inserted into body, classified in class 604 subclass 21.
- II. Claims 6-10, drawn to Method of applying or removing material to or from body, classified in class 604, subclass 290.
- III. Claims 11-16, 20-22, drawn to Shape memory material, classified in class 606, subclass 78.
- IV. Claims 17-19, 23-32, drawn to Therapeutic material introduced or removed through a piercing conduit (e.g., trocar) inserted into body, classified in class 604, subclass 506.
- V. Claims 33-36, drawn to By catheter, classified in class 604, subclass 508.
- VI. Claims 37-38, drawn to Therapeutic material introduced by subcutaneous implant (e.g., peritoneal injectors), classified in class 604, subclass 502.
- VII. Claim 39, drawn to Having body piercing means, classified in class 604, subclass 44.
- VIII. Claims 40-41, drawn to Material introduced or removed through conduit, holder, or implantable reservoir inserted in body, classified in class 604, subclass 93.01.
- IX. Claims 42-44, drawn to Coagulation, classified in class 606, subclass 40.

- X. Claims 45-47, drawn to Endoscopic, classified in class 606, subclass 46.
- XI. Claims 48-49, drawn to By needle, classified in class 606, subclass 44.
- XII. Claims 50-51, drawn to With formable electrode, classified in class 606, subclass 47.

The inventions are distinct, each from the other because of the following reasons:

Inventions I - XII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different designs and effects.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Neil Sudol on 16 June 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication from the Examiner should be directed to Examiner Jaime Corrigan whose telephone number is (571) 272-4858. The Examiner can normally be reached on Monday – Friday from 8:30 a.m. – 6:00 p.m. 2nd Friday off.
